

Veteran's Recommendations from Chief John Carmichael

In any event, I think it would also be a good idea to also recommend:

1. Marijuana Establishments who operate in a city or town should assign a liaison to the local communities Veteran's Agent (and in communities that do not have an agent, the County Veteran's Agent). These agents are responsible for advertising and assisting veterans and disabled veterans in employment and training resources, and they could help link them to employment opportunities within the establishments.
2. Work with US Department of Veteran's Affairs (Boston) to post and alert employment opportunities for Massachusetts veterans.
3. Work with Veterans radio stations or radio shows such as Veterans' Voice on 95.9-FM WATD, to recruit veterans for job opportunities.
4. Allow/create local incentive programs for marijuana establishments within the host community.
